## PROJECTS

### **Leveraging Data Analytics for In-depth Analysis in Dental Clinic Database Management System**

May 2024

This research aims to explore the potential of data analytics in unlocking valuable insights from dental clinic databases. The goal is to understand how this can improve operational efficiency, patient care, and overall business performance

### **Scholarship and Educational Assistance Management System**

December 2023

The SEAMS console application is a prime example of efficiency and accessibility as it drives the digitization of scholarship and educational assistance management forward. It is essential to the democratization of educational access and the promotion of academic success for worthy candidates.

### **Guidance Counseling: Student Information Sheet (SIS) & Student Information Updating Form (SIUF) System**

May 2023

The system aims to collect pertinent details encompassing students' educational background, personal information, family background, motivations, health, and other relevant factors.

---
